An intensive and focused communication campaign against COVID 19 Pandemic, organized by Directorate of Education.

VACCINATION AGAINST CORONA VIRUS

REPORT

- **Event: “VACCINATION AGAINST CORONA VIRUS”**
- **Date of Event: 20th -24th of September**
- **Target Group- Students of classes I-V. (1300 Approx.)**
- Delhi Public School, Vasant Kunj, conducted online sessions on **“Vaccination Against Corona Virus”** from 20th September to 24th September, 2021. To bring awareness about Corona Virus Vaccination and to further instill COVID appropriate behaviour in children , an educational presentation was shown and related discussion was held in various classes The children participated enthusiastically in the discussions and learnt about the importance of vaccines to protect us from the virus.

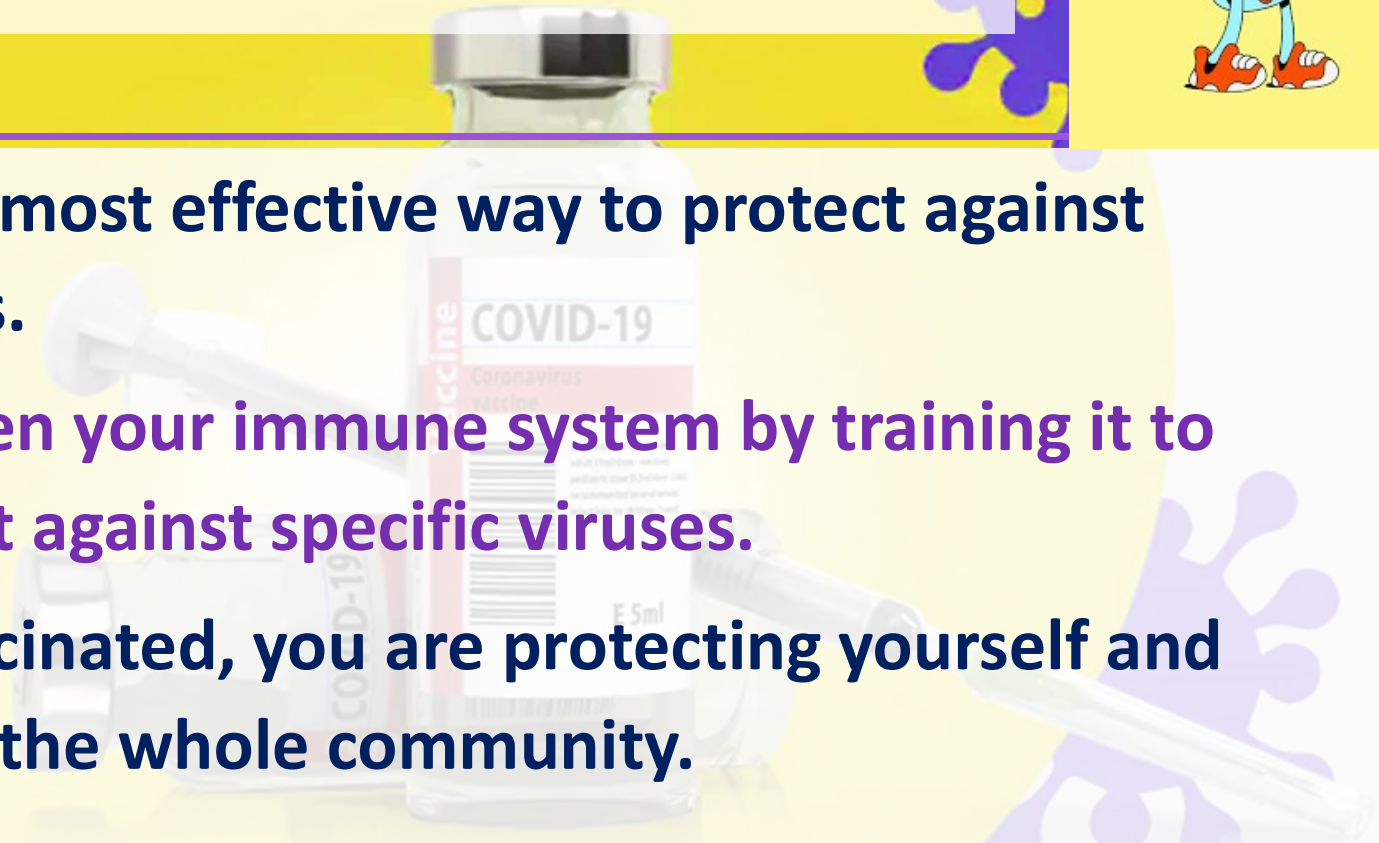

COVID 19 Vaccination

Why we need to get Vaccinated..

- ❖ Vaccination is the most effective way to protect against infectious diseases.
- ❖ Vaccines strengthen your immune system by training it to recognise and fight against specific viruses.
- ❖ When you get vaccinated, you are protecting yourself and helping to protect the whole community.

Who should get Vaccinated...

- ❖ All eligible citizens above the age of 18 years can get the COVID-19 vaccine from May 1st, 2021.
- ❖ It is advisable to receive complete schedule of COVID-19 vaccine irrespective of past history of infection with COVID-19.
- ❖ Children below the age of 18 years should get vaccinated when the Government of India begins vaccination drive for children.

When you get Vaccinated...

- ❖ Rest at the vaccination centre for at least half an hour after taking the COVID-19 vaccine.
- ❖ Inform the nearest health authorities in case you feel any discomfort or uneasiness subsequently.
- ❖ Remember to continue following key COVID-19 Appropriate Behaviour.

Continue Covid Appropriate Behaviour.

It is absolutely necessary that everyone who has received the **COVID-19 vaccine should continue to follow the COVID-19 appropriate behaviour i.e., mask, social distancing and hand sanitization to protect themselves and those around from spreading the infection.**
